

ALL BUSINESS SOLUTIONS

ABS – All Business Solutions, started its activity in 2013, as a result of identifying the need to provide open source IT services in the north of Portugal. Our human resources have a many years of experience in various areas of IT that, together with our skills and knowledge, enable us to provide excellent service to our clients.

Based on ABS's different business areas, we provide the market with different services and skills, properly studied and adjusted to emerging challenges. We offer a team of qualified professionals, capable of providing the best solution for the client's goals. We view every challenge as unique and we customize our solutions according to the identified needs, shaping the projects to achieve the desired results.

MISSION

To offer the best solutions in open source information technology in order to fully meet the needs of our clients and partners, so as to provide them with better results and make them more competitive.

VISION

We are recognized for our excellence in the provision of IT services and the creation of value for our clients.

VALUES

Integrity

We act with integrity, while maintaining the highest respect for such values as freedom, independence and honesty. We demand of ourselves and others the highest ethical standards.

Flexibility

In adapting to the needs of our employees, clients and partners to meet their needs.

Transparency

We have a policy of total transparency in relation to our processes, services, working methods and results. This is manifested especially in the way we act and communicate, where we always try to use clear, easily understood language, and seek understanding between all parties.

Commitment

In each of us there is a value commitment to ABS and to all members of this team. This commitment goes beyond our office and extends to our clients and partners. We will give our very best, to help you be the best you can be - count on us.

Excellence

We have a team of qualified professionals of proven quality with many years of experience in the IT area. We seek to promote a culture of lifelong learning in order to encourage innovation and creativity, so that these allies of superior professionalism and technical quality are reflected in outstanding results.
